
Cargo Shelf, Column Forming Machine

Welcome to our website! This page shows two types of our products, which are cargo shelf forming machine and column forming machine. Our forming equipment is durable, highly automated, and features high efficiency, low energy consumption. In addition, cargo shelves and columns made by our product are not only aesthetic, but functional, too.

1. Cargo Shelf Forming Machine HZ-300

Our cargo shelf forming equipment is primarily composed of automatic feeding machine, guide device, leveling unit, punching unit, forming unit, cut to length unit, recoiler, and electrical control cabinet.

Forming steps	18
Material thickness	2.0mm-3.0mm
Forming speed	(5-10)m/min
Motor power	15kw

2. Column Forming Machine HZ-330

Forming steps	22
Material thickness	1.5mm-2.5mm
Forming speed	(5-10)m/min
Motor power	11kw

As an experienced forming equipment manufacturer in China, we provide a wide range of products, like roll shutter forming machine, tile roof forming equipment, C, Z shape forming machine, and more. . Since our inception, we have been dedicated to offering high quality products to worldwide customers. To accomplish this, we utilize advance equipment like CNC lathe, use only qualified raw materials, components, and conduct strict quality control measures at each production procedure. As a result, our products are high quality, long lasting, and CE certified. We welcome you to contact us for more information.
